

1. What is UTI-Free® and what it contains: UTI-Free® is a specialized food supplement with L-methionine, L-ascorbic acid, D-mannose and calcium citrate.

2. Qualitative and quantitative composition: Each sachet of UTI-Free® contains 1.5g of L-methionine, 1g of L-ascorbic acid (1250% RDA), 1.5g of D-mannose and 1.2g calcium citrate (38% RDA calcium). Excipients: flavoring, sweeteners, flow enhancing agents (1.7g Nutriose®, 132mg SiO₂). The energy value of UTI-Free® is 11,4Kcal per sachet.

3. Indicated use: As a supplement of the diet UTI-Free® could sustain physiological urine acidity, defend and maintain a balanced urinary tract flora.

4. Dosage and administration: The dosage of UTI-Free® is two sachets per day for a period of seven days. **The evening dose is more important than the morning dose.** After the seven days period, the dosage of UTI-Free® is one sachet in the evening. Each sachet of UTI-Free® should reconstitute with water or fruit juice.

5. Caution: Do not exceed the highest recommended daily dose. Keep out of children's reach. Consult your doctor if you're pregnant or breastfeeding or if you have health issues. Store at room temperature (15-30oC) and avoid contact of the product with water, heat radiators or its direct exposure to sunlight. Do not use the product beyond the expiration date printed on the outer package. UTI-Free® does not prevent, treat or cure a human disease. Dietary supplements should not be used as a substitute for a varied diet.

Package: Carton box containing 14 sachets of UTI-Free® and a product information leaflet.

Net weight: 120.4g.
